Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 August 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 4 and 25 are rejected under 35 U.S.C. 102(e) as being anticipated by Boyd et al. (US 6166831).

Regarding claim 25, Boyd teaches a line scan sensor comprising:

First (30) and second (32) rows of pixels defined along respective first and second lines, the first line being spaced from and parallel to the second line;

corresponding first and second readout registers (42b and 44b), an end register element of the first readout register being coupled to an end register element of the second readout register, the coupled end register elements being coupled so as to function as a single output node of a readout register (figures 4 and 5);

a plurality of first channel structures, each channel structure of the first channel structures being disposed between a corresponding pixel of the first row of pixels and a corresponding register element of the first readout register (figures 4 and 5); and

a plurality of second channel structures, each channel structure of the second channel structures being disposed between a corresponding pixel of the second row of

pixels and a corresponding register element of the second readout register (figures 4 and 5).

Regarding claim 4, Boyd teaches that each pixel of each row of pixels includes at least one of a photo diode and a pinned photo diode.

Allowable Subject Matter

Claims 6-7, 9-13, 15 and 17 are allowed over prior art.

Claims 2-3 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Boyd fails to teach that a first clocking structure disposed over and transverse to the plurality of first channel structures, wherein the first clocking structure includes a transfer gate electrode and a delay well electrode; and

a second clocking structure disposed over and transverse to the plurality of second channel structures, wherein the second clocking structure includes a transfer gate electrode and a delay well electrode.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
